Claims 1-16 are pending in this application.

Applicant's election of sodium perborate and diethylene triamine penta(methylenephosphonic acid) (hereinafter, "DTPMP") as single disclosed species of hydrogen peroxide source and hydrogen peroxide stabilizer, respectively, in Paper No. 8 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 1-16 will presently be examined to the extent that they read on the elected subject matter, *supra*.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 rejected under 35 U.S.C. 102(b) as being anticipated by Martin et al. (US 5,725,887).

Martin et al. explicitly disclose a preservative for ophthalmic solutions having hydrogen peroxide compatible components (column 1, lines 15-17; column 2, lines 46-50). pH of the eye and compatibility with the ocular environment are taken into account (column 3, lines 1-15), and pH of about 5.5-about 8 is disclosed (column 7, lines 16-22). Sodium perborate is explicitly disclosed as a hydrogen peroxide source (claim 4). Source of hydrogen peroxide is stabilized by the elected DTPMP (column 3, lines 17-22; paragraph bridging columns 5-6). The hydrogen peroxide from the source is present in

10-1000 ppm or 0.002 to 0.03%. Preservation of drugs for the ocular environment is taught (column 3, lines 44-62), as well as solutions that are ophthalmic active agent free (column 3, last paragraph). See also claims 1, 4, 8, 9, 11.

All of the claimed features are thereby explicitly disclosed, and the claims are anticipated by Martin et al.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOHN D PAK whose telephone number is (703)308-4538. The examiner can normally be reached on Monday to Friday from 8 AM to 4:30 PM.
